

Galvanized Chain Link Fence

Chain link fence is simply a woven steel wire fence coated with zinc to prevent rust, commonly referred to as galvanized chain link fence. There are two kinds of **galvanized chain link fence**: galvanized before weaving (GBW) and galvanized after weaving (GAW). The vast majority on the market today is galvanized after weaving. **Galvanized chain link fence** is the favorite for residential and industrial needs. It's still one of the easiest and most cost effective ways to provide security and access control.

Materials:

The main materials of **galvanized chain link fence** are galvanized wire and stainless steel wire.

Assortments:

Hot dipped galvanized chain link fence

Electro galvanized chain link fence

Features:

- * Does not break, sag or roll up at the bottom
- * Long lasting service life
- * Strong, durable and flexible construction
- * Convenient transportation and installation
- * Weather resistance, corrosion and alkali resistance
- * Provides optional security and protection
- * Available in a variety of dimensions and styles, as suited to your needs

Applications:

- * Galvanized chain link fencing can be custom: built to the specific needs of the local school.
- * It defines the property lines while providing protection for your property, children, and pets.
- * Versatile and creative: a galvanized chain-link fence system can be an excellent choice. With the right fence you can expect years of protection, privacy and value.
